

Pure Water Sciences, LLC

Residential/Commercial Swimming Pools, Spas, Waterfalls and Fountains

Thank you for the opportunity to present the ECOsmarte water purification system and equipment that was developed by NASA in 1967. After studying and redesigning the original technology for the use and benefit of the general public, it was introduced by ECOsmarte in 1994. Their "Planet Friendly", environmentally sensitive, water purification system provides the best available purification technology for the health and safety of you family and friends and for the price!

This introductory "Front Sheet" will give you a good overview of what the Ecosmarte water purification system and products are all about. The brochure and company website can add much more detail. There are numerous commercial applications for the ECOsmarte systems too.

THE BASICS . . . You will be:

- Swimming, playing or relaxing in purified, oxygenated "spring-like" water
(No more dried skin, bleached hair, burning eyes, foul chlorine odors, showers after swimming)
- Eliminating the need for any harsh and un-healthy chemicals
- Helping to keep the natural environment clean
- Providing a much healthier swimming environment for your family and friends
- Extending life to your existing pool and pool equipment systems
- Eliminating offensive odors in your heated spa
- Stopping the build-up of scale and algae in your pool, decorative fountains or waterfalls
- Saving energy and money with much lower pool operating costs

FAQ's:

Q: Can I start with the very basic system and add components to it? A: Yes

Q: Who installs it? A: With the Operating Guide, if you're handy, you can do it yourself or have your pool service do it, or hire a plumber.

Q: Is there a Warranty? A: Yes, ECOsmarte provides a full 5 year Warrantee.

Q: What routine maintenance is required? A: Virtually none, except to do normal pool housekeeping and keep an eye on the pH level and filter as usual.

Q: Can I really eliminate all chemicals, chlorine and salt? A: Yes, completely. For municipal pools each state requires a minimum chlorine level that must be maintained.

Q: Do I have to replace my current sand or DME filtration media? A: No, but it is recommended to use the ECOsmarte Glass Media in order to realize the greatest benefit.

Q: How is my pH level controlled? A: With the programmable-CO2 system it is automatically controlled.

Q: Are there special electrical requirements? A: No, it will operate with 110V or 220V power.

Q: After it is installed, who do I call if I have a problem or questions? A: I am always available but there is also a Toll-Free Support Hot-Line (800-466-7864) and Online Support at ECOsmarte.com.
