

WATER PURIFICATION FOR POOL PURE WATER & WHOLE HOUSE POE SYSTEMS

Science behind the industry:

1. **Copper Ionization**—Controls or destroys bacteria, scale and algae, eliminates need for chlorine.
2. **Titanium and Oxygen**—controls oxidation of water and expansion of lotions and metals for easier filtering
3. **CO2 Introduction**—controls pH levels
4. **Carbon Filtering POE Systems**—enhances taste, eliminates odors, controls chemical contaminants, organics/inorganics and chlorine byproducts. This is for the house systems only.
